Program Overview

The Columbia masters in economics program is designed for students aiming to develop a thorough understanding of economic principles and quantitative techniques. The program offers a blend of theoretical knowledge and empirical skills, allowing students to analyze complex economic issues. Typically completed in one to two years, the curriculum provides flexibility for students to tailor their studies towards their interests, including microeconomics, macroeconomics, econometrics, and applied economics. Columbia's location in New York City also offers unique opportunities for internships and networking within financial institutions, government agencies, and international organizations.

Degree Options and Duration

Columbia University offers a Master of Arts (MA) in Economics, with options for full-time or part-time enrollment. The standard full-time program duration is two academic years, though accelerated paths may be available for qualified students. Part-time students can extend their studies over a longer period to accommodate professional or personal commitments. The program emphasizes a strong quantitative foundation, with rigorous coursework and research projects.

Program Objectives

The primary objectives of the Columbia masters in economics include:

- Developing expertise in economic theory and quantitative analysis
- Enhancing the ability to conduct independent research and policy evaluation
- Preparing students for advanced doctoral studies or professional careers
- Fostering critical thinking and effective communication of economic concepts

Admission Requirements

Admission to the Columbia masters in economics is highly competitive and requires strong academic credentials. Prospective students are evaluated based on their prior coursework, standardized test scores, letters of recommendation, and statement of purpose. The program seeks candidates with a solid foundation in mathematics, statistics, and economics, as well as a demonstrated ability to engage in analytical reasoning.

Academic Prerequisites

Applicants should have completed undergraduate coursework in calculus, linear algebra, statistics, and introductory economics. A bachelor's degree from an accredited institution is required, preferably with a major or minor in economics or a related quantitative field. Some applicants may be required to take additional foundational courses before starting advanced coursework if their preparation is insufficient.

Application Components

The application package for the masters in economics typically includes:

- Official transcripts from all post-secondary institutions attended
- Graduate Record Examination (GRE) scores, emphasizing quantitative reasoning
- Letters of recommendation from academic or professional references
- A statement of purpose outlining academic interests and career goals
- Resume or curriculum vitae highlighting relevant experience

Curriculum and Coursework

The curriculum of the Columbia masters in economics is designed to build a robust understanding of economic theory while providing practical skills in data analysis and econometrics. Students engage with core courses, electives, and research seminars that cover a broad spectrum of economic topics.

Core Courses
