Common Components of a Craftsman Snowblower

A Craftsman snowblower consists of various components, each playing a crucial role in its operation.

1. Engine

- The engine is the heart of the snowblower, providing the power needed to operate the machine.
- Common types include gas engines and electric motors, with gas engines being the most prevalent in residential models.

2. Auger

5. Skid Shoes

- A malfunctioning drive system can lead to reduced performance or complete failure to operate.

7. Controls
